FEELING WORD LIST

Each word, each letter, each mark of punctuation has significance and meaning...contains an energy vibration that makes a sound which becomes a word. Just as a picture is painted by joining colors together to give an image its feeling, to set its tone, to add depth, writers arrange and combine words to mentally paint a scene and create a memorable image within written communications. The following words describe intensely felt feelings and are listed in related groupings for the purpose of interchanging them in a context.
